

Land parcel of 11320m² that offers tranquility and ultimate privacy

65.000€

Code: 10566

Land parcel of 11320m² with beautiful views to the sea and the surrounding natural landscape.

An amphitheatrical piece of land, offering panoramic views of the serene country landscape and beautiful sea views to the west and southwest through the mountain hills.

An economical solution for one to invest in the ever-growing real estate market of the island, at a location that offers tranquility and ultimate privacy.

The land plot is able to be issued with a building permit for buildings up to 280 square meters or 364 square if it is a stone construction, but even double that for a revolutionary cave construction project.

A very good opportunity!
